**FEATURES**

- PVC-U fittings for the PVC pipe union.
- Material: PVC-U.
- Injection moulding.
- Density: 1,4 g/cm<sup>3</sup>.
- Color: grey RAL 7024.
- Dimensions: socket fittings D16 to D400 and threaded fittings from ¼" to 4".
- Dimensions:
  - Socket fittings according to EN 1452-3.
  - Threaded fittings according to ISO 7/1.
- For tubes according to EN 1452-2.
- Socket fittings: we recommend solvent cement for PVC-U.
- Threaded fittings: in order to guarantee the watertightness, PTFE thread-wrap tape must be used. In PVC-U metal unions, use PVC-U as the male.

**CARACTERÍSTICAS**

- Accesorios en PVC-U para unión de tuberías de PVC.
- Moldeo por inyección.
- Densidad: 1,4 g/cm<sup>3</sup>.
- Color: gris RAL 7024.
- Dimensiones: accesorios encolar de D16 hasta D400 y accesorios roscar de ¼" a 4".
- Dimensiones:
  - Accesorios encolar según la norma EN 1452-3.
  - Accesorios roscados según la norma ISO 7/1.
- Para tubos según norma EN 1452-2.
- Accesorios encolar: recomendamos el uso de cola para PVC-U.
- Accesorios roscados: para garantizar la estanqueidad sólo es admisible el uso de cinta de PTFE. En uniones PVC-U-metal, el macho debe ser el PVC-U.

### UP. 05. SFTR - SOCKET REINFORCED

#### Adaptor socket reinforced

- Female solvent socket & BSP female thread
- Reinforcement in stainless steel
- Metric series

#### Manguito unión mixto reforzado

- Encolar hembra y roscar hembra BSP
- Refuerzo en acero inoxidable
- Serie métrica

## PVC-U RUBBER-RING JOINT FITTINGS

### ACCESORIOS EN PVC-U CON JUNTA ELÁSTICA

#### FEATURES

Easy installation fittings, without effort or tools, thanks to its gaskets.

It is compulsory the use of an inner gasket to install it.

Designed to support earth movements or misalignments, ideally suited for underground installations.

It can absorb vibrations or pipe expansions due to its elasticity and flexibility.

To make the installation easier, it is very important to lubricate the gasket correctly.

- Material: PVC-U.
- Density: 1,4 g/cm<sup>3</sup>.
- Color: grey RAL 7011.
- Dimensions: from D63 to D315.
- Standards: dimensions and characteristics according to EN 1452.

#### CARACTERÍSTICAS

Accesorios fáciles de instalar, sin esfuerzo y sin herramientas gracias a las juntas.

Para su correcta instalación es necesaria la junta interior.

Está realizado para poder soportar movimientos de tierra y desalineaciones, ideal para instalaciones enterradas.

Gracias a su elasticidad y flexibilidad, absorbe mejor las vibraciones y la expansión del tubo.

Es muy importante una buena lubricación de la junta para instalar el tubo cómodamente.

- Material: PVC-U.
- Densidad: 1,4 g/cm<sup>3</sup>.
- Color: gris RAL 7011.
- Dimensiones: de D63 hasta D315.
- Normas: dimensiones y características según la norma EN 1452.

4	Chamfer to make an easier installation	Chaflán para una inserción más fácil	-

**TECHNICAL CHARACTERISTICS**

Working pressure at 20°C (73°F) water temperature:  
 • D63 - D315: PN 10 (150 psi)

**CARACTERÍSTICAS TÉCNICAS**

Presión de servicio a 20°C (73°F) temperatura de agua:  
 • D63 - D315: PN 10 (150 psi)

**PRESSURE / TEMPERATURE GRAPH  
 DIAGRAMA PRESIÓN / TEMPERATURA**

Life: 20 years  
 Hydrostatic maximum pressure a component may withstand in continuous service (without overpressure)

Vida útil: 20 años  
 Presión hidrostática máxima que un componente es capaz de soportar en servicio continuo (sin sobrepresión)

**ASSEMBLY**

**A.** Before assembling rubber ring fittings proceed as follows. In case of pipe end damaged: cut the pipe with a proper tool to obtain a square end.

**MONTAJE**

**A.** Antes de instalar los accesorios de junta elástica, proceda de la siguiente manera. En caso que el extremo del tubo está dañado: corte el tubo con una herramienta especial para obtener un corte recto perpendicular al eje.

**B.** Chamfer the pipe with a special tool as shown in the following picture and table.

**B.** Chafane el tubo con una herramienta especial según lo mostrado en la imagen y el cuadro siguiente.

D (mm)	63	75	90	110	125	140	160	200
L (mm)	6,0	7,0	9,0	10,5	12,0	13,5	15,5	19,0

**C.** Clean carefully the external surface of the pipe and lubricate only with soapy water (do not use oil or grease).

**C.** Limpie cuidadosamente la superficie externa del tubo. Lubrique solamente con agua jabonosa (no utilice aceite o grasa).

**D.** Clean carefully the socket seat in the fitting. Check gasket conditions. Introduce the sealing ring into its specific seat.

**D.** Limpie cuidadosamente el asiento de la junta del accesorio. Compruebe las condiciones de la junta. Introduzca la junta en su asiento específico.

**E.** Lubricate the internal surface of the rubber ring in the same way as the pipe.

**E.** Lubrique la superficie interna de la junta con un lubricante adecuado de la misma manera que el tubo.

**F.** Mark on the outside of the pipe the depth to be inserted into the socket of the fitting according to the lengths in the following table.

**F.** Marque en el exterior del tubo la profundidad a ser insertada en el accesorio según las longitudes del cuadro.

D (mm)	63	75	90	110	125	140	160	200
L max	94	104	109	115	124	133	139	169
L min	42	45	50	55	60	69	75	85
L	52	59	59	60	64	64	64	64

**G.** To introduce the tube into the fitting we recommend to use the appliance device shown in picture.

- Fix the special assembling device onto the pipe.
- Fix the fitting upon the device.
- With the lever, slide the fitting onto the pipe till you reach the reference mark.

**G.** Para introducir el tubo en el accesorio se aconseja utilizar un equipo como el mostrado en la imagen.

- Fije un dispositivo de ensamblaje especial sobre el tubo.
- Fije el accesorio sobre el dispositivo.
- Con la palanca, deslice el accesorio sobre el tubo hasta que se alcance la marca de referencia.

## GROOVED COUPLING ENLACE BRIDA RANURADA

Designed with a heavy housing for high pressure service. The housing key is wider than standard and the coupling housing is designed to clamp the bottom of the groove, thus providing an essentially rigid joint. It also eliminates movement at the joint.

Reduces linear or angular movement and is useful for valve connections and other points where rigidity is required.

Diseñado con una resistente cubierta para soportar altas presiones. La llave es más ancha que las estándares y el enlace está diseñado para agarrar el fondo de la ranura, proporcionando una unión rígida. También está pensado para eliminar los movimientos en la unión.

Reduce el movimiento lineal o angular y se puede usar para conexiones con válvulas o en otros sitios donde se requiera rigidez.

- Fast assembly.
- Allows misalignments up to 1°30'.
- EPDM joint.
- Coupling made of coated ductile iron.
- Bolts made of zinc plated carbon steel.

- Montaje rápido.
- Permite desalineaciones de hasta 1°30'.
- Junta en EPDM.
- Brida en hierro fundido pintado.
- Tornillos en acero zincado.

<sup>5</sup> Brida con distancia entre agujeros correspondiente a la brida DN200

At the time to make the relationship between adaptor and flange, for the compatibility it prevails the D size of the corresponding pipe.  
 Siempre que se deba relacionar manguito y brida, prevalece en su compatibilidad la medida D del tubo correspondiente.

## PVC-U FIX FLANGES BRIDAS FIJAS PVC-U

- EN 1452 / ISO 15493 Flange System.
- We recommend to follow flange installation instructions carefully to avoid any unnecessary tensions.

- Sistema de bridas EN 1452 / ISO 15493 .
- Recomendamos seguir exactamente las normas de montaje de bridas con objeto de evitar tensiones innecesarias.

\* Válido para Serie Industrial, Standard y Classic

## PVC-U UNIONS ENLACES 3 PIEZAS PVC-U

Unions are the preferred choice over flange adaptors for the connection of plastic pipes. With no metal parts, there is no corrosion and the weight is also reduced.

They are only available in small sizes (up until D110).

The union ends are manufactured in plain ends for solvent socket or thread always according the sizing standards, doing this system appropriate to adapt to other elements or systems. Cepex unions feature an o-ring in order to ensure better unions, so it is not needed the use of PTFE tape between nut and union end (it is only needed in the threaded ends).

They are not recommended when connected to pipe under bending stress.

The union nut should be tightened by hand. Must use a strap wrench for big sizes (D75, D90, D110).

With this type of unions, it is possible to mix several plastic materials.

Cuando hay que unir plásticos, éstos son preferidos a las bridas, ya que no contienen ninguna parte de metal y el diámetro exterior es más reducido.

En contrapartida sólo están disponibles para diámetros pequeños (hasta D110).

Los manguitos de conexión están fabricados en terminaciones lisas de encolado o roscadas, siempre bajo normativas standards, haciendo posible la adaptación a otros componentes (incluso de materiales distintos).

Los enlaces 3 piezas Cepex incorporan junta para asegurar estanqueidad entre los dos manguitos de la unión, por lo que no debe usarse cinta de PTFE entre tuerca y manguito (usar cinta de PTFE solamente en las terminaciones de manguito roscadas). No son recomendables cuando el tubo tenga que estar sometido a fuerza de flexión (debido a posibles desalineaciones).

No es necesario el uso de ninguna herramienta, se rosca con las manos. Usar llave de cinta en diámetros grandes (D75, D90, D110).

Mediante estos enlaces, se pueden combinar diferentes tipos de plásticos.

## CONNECTION POSSIBILITIES POSIBILIDADES DE CONEXIÓN

### Available standards

Solvent socket: metric, BS, ASTM  
Threaded: BSP, NPT

### Standards disponibles

Encolar: métrico, BS, ASTM  
Roscar: BSP, NPT

Ask for other types of unions or other materials (PP, PE100...)  
Consultar otros tipos de conexión o materiales (PP, PE100...)

## PVC-U MANIFOLD FITTINGS

### COLECTORES PVC-U

- Manifold fittings specially designed for the fast connection of 1" threaded elements, like electric valves assemblies, water supply, etc.
- Allowing fast and trouble-free installations.
- Available sizes: 1"
- Material: PVC-U
- PN 10 (150 psi)

Most irrigation systems need multiple watering stations, either for small residential areas, large landscapes or agriculture areas. At home one might have separate stations for the lawn and flower beds or there may not be enough water to irrigate the whole garden at the same time. This is when a series of valves is required.

These valves need to be connected together to the same source of water. The older ways were to create a manifold with costly galvanised metal or permanent assemblies.

Now with Cepex manifold fittings the job can be done:

- easier: no tools are required
- quicker: all parts are made to fit into each other
- more flexible: easy to change once assembled

- Accesorios colectores especialmente diseñados para la conexión rápida de elementos roscados de 1", tales como instalaciones con electroválvulas, suministro de agua, etc.
- Permiten realizar instalaciones con total facilidad y rapidez.
- Medidas disponibles: 1"
- Material: PVC-U
- PN 10 (150 psi)

La mayoría de sistemas de riego, ya sean pequeños para riego residencial o de mayores dimensiones para riego de zonas verdes o agrícola, requieren del uso de múltiples estaciones de riego.

En casa, es probable disponer de estaciones separadas para el césped y para las plantas, o puede no estar disponible la suficiente agua para regar todo el jardín a la vez. Es en estos casos que se requiere de series de válvulas.

Estas válvulas necesitan ser conectadas al mismo punto de suministro de agua. Antiguamente se instalaban colectores de metal galvanizado de alto coste o con montajes permanentes.

Ahora con los accesorios para colectores Cepex, este trabajo puede hacerse de una forma más:

- fácil: no se requieren herramientas
- rápida: todos los componentes están fabricados para encajar entre ellos
- flexible: es fácil hacer cambios una vez montados

## FLOWMETERS - ROTAMETER

### CAUDALÍMETROS - ROTÁMETROS

#### FEATURES

Flowmeters are transparent tubes with conical shape (narrow in its lower part and wider in the upper); they are installed in a perfectly vertical position along with the pipe of which we want to know the flow.

Within the tube there is a stainless steel floater, that will move upwards reaching a specific height depending on the weight of the floater and water pressure.

Thus, the greater is the flow, the higher will the floater move, marking a flow (l/h or GPM) in the scale which is stamped on the transparent tube.

- Available models from 10 to 1000 l/h (0,04 - 4,4 GPM).
- Assembly in vertical position.
- Union bushes in PVC-U.
- Tube in Styrene Methyl Methacrylate Copolymer.
- Measuring tube available in Polysulfon, Trogamid T<sup>®</sup>, etc. upon request.
- Float stops in PVDF and floats in AISI 316.
- Maximum working temperature: 55°C (131°F) according to standards VDE / VDI 3513, class 6.
- Maximum pressure 15 bar.
- Two visible scales on each meter: l/h and GPM.
- Available upon request: limit switches and transmitters.
- Applications: process control in water treatment, osmosis, heating and refrigeration systems, chemical industries, pharmaceuticals, etc.

#### CARACTERÍSTICAS

Los caudalímetros son tubos transparentes con forma cónica (estrecho en su zona inferior y más ancho en su zona superior); se instalan en posición perfectamente vertical en serie con la tubería de la que se quiere conocer el caudal.

Dentro del tubo se encuentra un flotador de acero inoxidable, que se desplazará hacia arriba alcanzando una altura concreta que dependerá del peso del flotador y del empuje del agua.

Así, cuanto mayor es el caudal, más arriba se posicionará el flotador, marcando un caudal (l/h o GPM) en la escala que se encuentra marcada en el tubo transparente.

- Modelos disponibles desde 10 hasta 1000 l/h (0,04 - 4,4 GPM).
- Montaje en posición vertical.
- Racordaje en PVC-U.
- Tubo en metacrilato de metilo.
- Bajo pedido tubo de medida disponible en Polisulfon, Trogamid T<sup>®</sup>, etc.
- Topes de flotador en PVDF.
- Flotador en AISI 316.
- Temperatura máxima de trabajo: 55°C (131°F) según normas VDE / VDI 3513, classe 6.
- Presiones hasta 15 bar.
- Doble escala visible en cada caudalímetro: l/h y GPM.
- Disponibles bajo pedido: automatismos y transmisores eléctricos.
- Aplicaciones: control de procesos en tratamiento de agua, osmosis, calefacción y refrigeración, industrias químicas, farmacéuticas, etc.

## SOLVENT CEMENT / CLEANER / PTFE TAPE

### ADHESIVOS / DISOLVENTES / CINTA DE PTFE

#### NOTES ABOUT THE SOLVENT

- Carry out an accurate turnover of the stock as the solvent cement can lose the original characteristics after 12 months of its manufacture.
- Stock in a dry and fresh place.
- Please, read the instructions of use.
- Different solvent cements for PVC-U and PVC-C (read the description).
- If you want to read the solvent socket recommendations, please refer to Pipe installation Section

#### NOTAS SOBRE EL ADHESIVO

- Realizar una correcta rotación del stock ya que el adhesivo puede perder sus características originales a partir de los 12 meses de su fabricación.
- Almacenar en un lugar seco y fresco.
- Ver las normas de utilización del envase.
- Adhesivos diferenciados para PVC-U y PVC-C (ver descripción).
- Para ver las recomendaciones de instalación con adhesivo, consulte la Sección de Instalación de tubería.

## PVC-U UNIONS

### ENLACES 3 PIEZAS PVC-U

Unions are the preferred choice over flange adaptors for the connection of plastic pipes. With no metal parts, there is no corrosion and the weight is also reduced.

They are only available in small sizes (up until D110).

The union ends are manufactured in plain ends for solvent socket or thread always according the sizing standards, doing this system appropriate to adapt to other elements or systems. Cepex unions feature an o-ring in order to ensure better unions, so it is not needed the use of PTFE tape between nut and union end (it is only needed in the threaded ends).

They are not recommended when connected to pipe under bending stress.

The union nut should be tightened by hand. Must use a strap wrench for big sizes (D75, D90, D110).

With this type of unions, it is possible to mix several plastic materials.

Cuando hay que unir plásticos, éstos son preferidos a las bridas, ya que no contienen ninguna parte de metal y el diámetro exterior es más reducido.

En contrapartida sólo están disponibles para diámetros pequeños (hasta D110).

Los manguitos de conexión están fabricados en terminaciones lisas de encolado o roscadas, siempre bajo normativas standards, haciendo posible la adaptación a otros componentes (incluso de materiales distintos).

Los enlaces 3 piezas Cepex incorporan junta para asegurar estanqueidad entre los dos manguitos de la unión, por lo que no debe usarse cinta de PTFE entre tuerca y manguito (usar cinta de PTFE solamente en las terminaciones de manguito roscadas). No son recomendables cuando el tubo tenga que estar sometido a fuerza de flexión (debido a posibles desalineaciones).

No es necesario el uso de ninguna herramienta, se rosca con las manos. Usar llave de cinta en diámetros grandes (D75, D90, D110).

Mediante estos enlaces, se pueden combinar diferentes tipos de plásticos.

\* Estas bridas tienen los agujeros dimensionados para permitir la instalación acorde a las normativas ASTM 16B.5 - ANSI 150 y ISO 15493.

## PVC-U UNIONS

### ENLACES 3 PIEZAS PVC-U

Unions are the preferred choice over flange adaptors for the connection of plastic pipes. With no metal parts, there is no corrosion and the weight is also reduced.

They are only available in small sizes (up until D110).

The union ends are manufactured in plain ends for solvent socket or thread always according the sizing standards, doing this system appropriate to adapt to other elements or systems. Cepex unions feature an o-ring in order to ensure better unions, so it is no needed the use of PTFE tape between nut and union end (it is only needed in the threaded ends).

They are not recommended when connected to pipe under bending stress.

The union nut should be tightened by hand. Must use a strap wrench for big sizes (D75, D90, D110).

With this type of unions, it is possible to mix several plastic materials.

Cuando hay que unir plásticos, éstos son preferidos a las bridas, ya que no contienen ninguna parte de metal y el diámetro exterior es más reducido.

En contrapartida sólo están disponibles para diámetros pequeños (hasta D110).

Los manguitos de conexión están fabricados en terminaciones lisas de encolado o roscadas, siempre bajo normativas standards, haciendo posible la adaptación a otros componentes (incluso de materiales distintos).

Los enlaces 3 piezas Cepex incorporan junta para asegurar estanqueidad entre los dos manguitos de la unión, por lo que no debe usarse cinta de PTFE entre tuerca y manguito (usar cinta de PTFE solamente en las terminaciones de manguito roscadas). No son recomendables cuando el tubo tenga que estar sometido a fuerza de flexión (debido a posibles desalineaciones).

No es necesario el uso de ninguna herramienta, se rosca con las manos. Usar llave de cinta en diámetros grandes (D75, D90, D110).

Mediante estos enlaces, se pueden combinar diferentes tipos de plásticos.

## CONNECTION POSSIBILITIES

### POSIBILIDADES DE CONEXIÓN

#### Available standards

Solvent socket: metric, BS, ASTM  
Threaded: BSP, NPT

#### Standards disponibles

Encolar: métrico, BS, ASTM  
Roscar: BSP, NPT

Ask for other types of unions or other materials (PP, PE100...)  
Consultar otros tipos de conexión o materiales (PP, PE100...)

### UP. 50. SF. MA - UNION MA

**Union**

- Female solvent socket
- ASTM series
- EPDM O-Ring

**Enlace 3 piezas**

- Encolar hembra
- Serie ASTM
- Anillo tórico en EPDM

## SIGHT GLASSES VISORES DE LÍQUIDOS

- Necessary element to show the fluid pass through an installation, as well as displaying the liquid state (degree of turbidity).
- Two available models, with the sight glass in several materials (PMMA or SAN).

- Elemento necesario para mostrar el paso de líquido por una instalación, así como la visualización del estado del líquido (grado de turbidez).
- Dos modelos disponibles, con el visor en distintos materiales (PMMA o SAN).

FIG.	Parts	Despiece	Material
1	Union / flange	Manguito / brida	PVC-U
2	O-ring	Junta	EPDM
3	Viewer	Visor	PMMA / SAN
4	Bolts	Tornillos	Zinc plated steel

### UP. 54. SF

- Material:  
D50 - D63: PMMA (Mod. A)  
D75 - D225: SAN (Mod. B)
- 4 bolts
- Female solvent socket
- ASTM series

- Material:  
D50 - D63: PMMA (Mod. A)  
D75 - D225: SAN (Mod. B)
- 4 tornillos
- Encolar hembra
- Serie ASTM
